CODEGO

WHITE LABEL DEVICES

READY TO WEAR YOUR BRAND

Let's Get Started

THE OPPORTUNITY

Token distribution often fails to create real utility for users.

Our Devices turn this challenge into a business opportunity: daily native token rewards anchored to a physical device, bridging the gap between digital assets and real-world engagement.

CODEGO :>

HOW IT WORKS

DAILY REVENUE FLOW

The device distributes revenue in USDC to whitelabel partners.

FLEXIBLE MODEL

Partners choose how to split rewards between user incentives and their own margin.

USER ENGAGEMENT

End-users receive daily Native token rewards, driving loyalty and retention.

HOW IT WORKS

Step 1 – Revenue Generation

Our Home and Power Home devices connect to our decentralized GPU network, generating daily revenue.

Step 2 – Partner Whitelabel Integration

As a whitelabel partner, you receive:

- A dedicated, branded app for your project. (Including Front End and Back-end)
- Daily revenue flows in USDC, credited directly to you.
- Full control to decide what % goes to your users vs. your margin.

Step 3 – User Experience

 Your community receives their rewards in your native token via the branded app. From there, they can monitor their devices, track daily revenue, and convert rewards into USDC whenever they choose.

Step 4 – Engagement & Loyalty

 Daily payouts keep users connected and loyal, while you build recurring revenue through device sales, activations, and token margins

THE SOLUTION

Daily earnings that matter – End-users receive consistent token rewards, a tangible reason to stay engaged.

Flexible partner margins – Whitelabel partners control reward splits, maximizing profitability.

Multiple revenue streams – Device sales, activations, and recurring token margins.

Scalable & transparent – Powered by USDC, ensuring trust and global reach.
